CAREER OBJECTIVE

Motivated B.Tech (AI & ML) undergraduate seeking a Software Engineer / Graduate Engineer Trainee / Associate Software Engineer role. Proficient in Python, SQL, OOP, RESTful APIs, Git/GitHub, and full-stack development. Skilled in SDLC, Agile, testing & debugging, and analytical problem-solving. Actively gaining industry experience through ongoing internships in AI/ML, Data Analytics, and UI/UX design.

EDUCATION

B.Tech – AI & Machine Learning 79.3% Annamacharya Institute of Technology and Sciences, Rajampet	2023 – 2027
Intermediate (12th) 73.6% AP Model School & Jr. College, Reddyvaripalli	2022 – 2023
SSC (10th) 83.17% AP Model School, Reddyvaripalli	2020 – 2021

TECHNICAL SKILLS

Languages: Python (Primary), Java (Fundamentals), HTML5, CSS3
Core Concepts: OOP, Data Structures & Algorithms, DBMS
Database: SQL / MySQL — schema design, normalisation, query optimisation
Tools & Libraries: Git / GitHub, Streamlit, scikit-learn, NumPy, Pandas
Practices: Agile, Testing & Debugging, Code Review, Technical Documentation, Analytical Thinking

PROJECTS

- AccessAI – AI-Powered Accessibility Audit Agent** | *React, FastAPI, Playwright, Groq AI*
- Developed an AI-powered web accessibility auditing platform automating WCAG compliance analysis, accessibility scoring, and AI-generated recommendations; built a dashboard with audit history tracking and report generation.
 - Integrated Playwright for automated browser-based audits, FastAPI for backend processing, and Groq AI for intelligent recommendations, following OOP and SDLC principles throughout the development lifecycle.
- Library Management System** | *Python, Pandas, SQL, Streamlit*
- Built a full-stack app using OOP and a normalised SQL schema for book/member management with automated fine calculation; developed a modular Streamlit UI with clean documentation and structured problem-solving.

INTERNSHIPS & CERTIFICATIONS

- UI/UX Design Internship** | InternSpot 2026 (Ongoing)
- Minor:** Miller's Law UX Report | **Major:** Figma Jam Collaborative Design Report (7+ pages)
- Applying design-thinking, user-research, and wireframing to build accessible, user-centred interfaces; completing projects on Figma Jam (collaborative design workflows) and UX principles including Miller's Law.
 - Translating usability-test insights into iterative design improvements, reinforcing analytical thinking, problem-solving, and documentation skills in a live internship environment.
- Data Analytics & Business Analytics Internship** | InternSpot 2026 (Ongoing)
- Minor:** Dataset Options & Table Matrix Report | **Major:** Charts & Data Visualisation Report (3+ pages)

- Conducting data analysis and BI tasks using SQL, Excel, and visualisation tools; producing structured reports on dataset evaluation, table-matrix design, and chart-based insights to support data-driven decisions.

AI/ML using Python Internship | Technotron

2026

- Developed and evaluated ML models using Python, scikit-learn, NumPy, Pandas across the full model lifecycle; version-controlled all code via Git/GitHub with clean technical documentation.

WORKSHOPS

Entrepreneurship & Innovation Workshop | Wadhvani Foundation – Ignite Program

2025

- Practised iterative prototyping and Agile delivery in cross-functional teams; developed stakeholder communication and presentation skills through a startup simulation environment.
